Professional Summary

The companies I've worked for have raised a roughly $159.9 million, I was a core contributor to $61.4 million of that total which has led to $282million in exits.

Education

Laguna College of Art and Design - BFA
San Francisco State University - Continued Education, 3D Design
Stanford - Continued Education, Machine Learning

O1 Cap Ventures Designer in Residence Fed 2026 - June 2026
0 - 1 on multiple products. Leading design from concept to competition. AI first process.

Landbase Head Product Design Jan 2025 - Dec 2025
Came in as the first design leader with a heavy focus on product and growth. Within 30 days I redesigned the product to be PLG-forward; within 90 days I moved design-eng process to AI-first. The CEO used my prototype to pitch investors, raising $30M in the Series A.

Arya Health Founding Product Designer Dec 2023 - Jan 2025
Chased some of the hardest problems in AI and RPA. Helped lead the company into new markets and greater total contract value, directly impacting the raise of $7M in funding.

Levels Health Principle Product Designer Jan 2022 - Sep 2023
Designed and deployed Levels' retention/re-engagement efforts which became fundamental to the business, driving a 32% increase in LTV. Embraced async work culture and radical independence.

Anchor Maps Product Designer, Founder Jan 2020 - 2022
Built an AR app for mapping real-world spaces with pins, text, photos, videos and links. Led product strategy, marketing and engineering across 3 teams (10 people). Highest-ranked AR app on the App Store (4.9 stars).

Doc.ai (sold to Sharecare) Founding Product Designer Dec 2018 - Jan 2022
Core contributor to $41M raised. Within 3 months I created an AI product that led to a $20M investment from Anthem Healthcare. Worked closely with the CEO on projects that fundamentally transformed the business. Grew and managed in-house and outsourced teams. Sold for $247M to Sharecare.

Facebook/ Instagram IC7 Product Designer Jan - Dec 2018
I was brought into the Building 8 Group (R&D) to invent new products for theoretical hardware device categories rolling out in 2024. My day to day involved going from 10,000 feet up strategy down to hands on prototyping. I made 30+ prototypes for a projected AR device, working closely with engineering, hardware and leadership.

WeeShip Product Designer, Founder Dec 2014 - Jan 2018
In 2014 I started a Design Studio with some friends. I learned a ton about building a business and managing relationships in a short amount of time. We were able to touch dozens of projects some highlights are:

- **Navdy** wanted to build what can best be described as Google Glasses for your car. I designed and built the first UX prototype that Doug (CEO) took out for raising $6.9m and supported them as they became more real, helping them staff and grow helping them eventually raise $33m
- **Wonder Workshop** set out in building a toy for teaching kids ages 3yr+ the fundamentals of programing and came to us to build an interface. It was challenging. I lead every aspect of the interface and user journey from concept to V1, overseeing all engineering development. The work I did with them lead to $6.9m in funding which then later let them raise $78.9 million in funding
- **Intel/GE** I worked with a joint marketing team to concept, design, animate and code animations for the launch of an effort to reduce electricity needs of devices. The campaign generated 2.7million interactions across multiple platforms.
- **Nike** I was subcontracted to design and develop dozens of animations for the Nike Fuel Band leading to creation of the “Goal” animations that ended up driving much of the success of the product.

JP Morgan Chase VP of Design Jan 2011 - Jan 2014
At JPMC I was brought in to pave the future of mobile banking. I worked closely with executives across many devisions of the business to build some amazing products. I helped scale the team from 2 to 40+ and was awarded 3 US patents for interactions and survived one of the most political corporate structures in the world.

Disney Interactive Lead UX UI Designer 2010 - 2011
After Taptap sold to Disney, I was given much more responsibility, leading projects like “Wheres My Water?” and Cars 2 which held records like “Only app to go #1 on top free and grossing at the same time.”

Tapulous (Acquired by Disney) Lead Designer 2009 -2010
I initially joined the Taptap team as a contractor, contributing to ideas and graphics. Later, I became a full-time employee as the franchise was expanding. I acquired extensive knowledge during my time there, too much to list. I worked closely with the leadership team to come up with new ideas, grow the apps we had in place and most of all how to have fun at work.
